

技術系専門試験問題演習講座 総合職 工学の基礎

H.28 国家総合職 工学 No.3
(数学)

(解1) 三角比の公式を使い,

余弦定理より

$$CA^2 = 4^2 + 5^2 - 2 \cdot 4 \cdot 5 \cos \theta = 4^2 + 3^2 - 2 \cdot 4 \cdot 3 \cdot \overset{-\cos \theta}{\cos(180^\circ - \theta)}$$

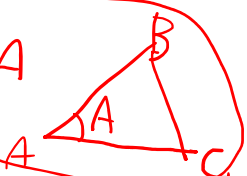

$\triangle ABC$ $\triangle ADC$

$$41 - 40 \cos \theta = 25 + 24 \cos \theta \quad \therefore \cos \theta = \frac{16}{64} = \frac{1}{4}$$

$$\sin \theta = \frac{\sqrt{15}}{4}$$

$$\begin{aligned} \text{面積} &= \triangle ABC + \triangle ADC \\ &= \frac{1}{2} \cdot 4 \cdot 5 \sin \theta + \frac{1}{2} \cdot 3 \cdot 4 \cdot \overset{\sin \theta}{\sin(180^\circ - \theta)} \\ &= \frac{5\sqrt{15}}{2} + \frac{3\sqrt{15}}{2} = 4\sqrt{15} // \end{aligned}$$

<公式>

$$\triangle ABC = \frac{1}{2} AB \cdot AC \cdot \sin A$$

$$\frac{4}{2} \sqrt{15}$$

(解2) 図形, 比乙解

$$h = \sqrt{4^2 - 1^2} = \sqrt{15}$$

$$S = \frac{1}{2} \times 8 \times \sqrt{15} = 4\sqrt{15} //$$

$$S = \frac{1}{2} \times (3+5) \times \sqrt{15} = 4\sqrt{15} //$$
